

SHAIJU RAJU

Full Stack Developer | React · Node.js · PostgreSQL · REST APIs

+91 8943533771 · shaijur2014@gmail.com · [linkedin.com/in/shaiju-raju](https://www.linkedin.com/in/shaiju-raju) · github.com/Shaiju-Raju

Portfolio: shaiju-raju-kmth.vercel.app | Live Project: lnkd.in/guAX5VVb

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience designing, building, and deploying production-grade web applications using React, Node.js, Express, and PostgreSQL. Proven ability to develop RESTful APIs, implement JWT-based authentication, architect scalable database schemas, and integrate end-to-end full-stack solutions. Built and deployed an e-commerce platform, a data visualization dashboard, and a secure authentication-enabled Todo application. Career transitioner with 10+ years of professional experience in accounting and business operations, bringing strong analytical thinking, data literacy, and professional discipline to software development.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Vite

Backend: Node.js, Express.js, REST API Development, MVC Architecture

Database: PostgreSQL, Database Schema Design, Query Optimization, pg Pool

Auth & Security: JWT (JSON Web Tokens), bcrypt, Google OAuth 2.0, Protected Routes, Session Management

Payment Integration: Razorpay API, Payment Gateway Integration, Secure Transaction Processing, Order Fulfillment

E-Commerce: Product Catalog, Cart Management, Order Flow, Storefront Development

Data Visualization: Chart.js, Dynamic Filters, Dataset Aggregation

Tools & Platforms: Git, GitHub, Netlify, Render, Vercel, VS Code

Concepts: RESTful APIs, Middleware, Async/Await, Error Handling, CRUD Operations, Responsive Design, Agile Basics

PROJECTS

Mini E-Commerce Platform (Full Stack)

2025

Tech: React, Node.js, Express, PostgreSQL

Live Demo: mini-ecommerce-mystore.vercel.app | **GitHub:** github.com/Shaiju-Raju/mini_ecommerce

- Built a full-stack e-commerce web application featuring product listing, shopping cart, and order management functionality
- Integrated Razorpay Payment Gateway for secure online transactions, implementing order creation and payment verification workflows
- Developed RESTful API endpoints for product CRUD operations, cart management, and order processing
- Implemented user-facing storefront with React, ensuring responsive design and reusable component architecture
- Integrated frontend and backend using async API calls with proper error handling and loading states
- Deployed frontend on Vercel with backend hosted on Render

Full Stack Todo Application (JWT Authentication)

2025

Tech: React, Node.js, Express, PostgreSQL

Live Demo: todo-app-shaiju-raju.netlify.app | **GitHub:** github.com/Shaiju-Raju/FullStack-Todo

- Implemented secure user registration and login using JWT-based authentication with bcrypt password hashing
- Built protected REST API routes with middleware-based authorization for secure CRUD operations
- Used PostgreSQL connection pooling (pg Pool) for efficient and scalable database access
- Designed RESTful APIs with centralized error handling and modular middleware structure
- Deployed frontend on Netlify and backend on cloud platform with full end-to-end integration

Insights Dashboard (Full Stack Data Visualization)

2025

Tech: React (Vite), Node.js, Express, PostgreSQL, Chart.js

Live Demo: lnkd.in/guAX5VVb | GitHub: github.com/Shaiju-Raju

- Developed a full-stack data visualization dashboard to analyze and display large datasets using interactive Chart.js charts
- Designed and implemented REST APIs to fetch, filter, and aggregate insights data from PostgreSQL database
- Built dynamic multi-parameter filters: End Year, Topic, Sector, Region, Intensity, Country, and Likelihood
- Structured PostgreSQL database schemas and optimized SQL queries for improved performance at scale
- Followed clean UI principles with reusable React components and a scalable backend architecture

Additional Practice Projects

Built multiple full-stack applications using Node.js, Express, EJS, and PostgreSQL focusing on CRUD, routing, middleware, server-side rendering, and MVC architecture. All source code available on GitHub.

PROFESSIONAL EXPERIENCE

Accounts Executive & Indoor Sales

Bahrain | 2014 – 2025

Began self-directed learning in web development in 2024 alongside employment. Returned to India in mid-2025 to pursue full-time transition into software development.

- Managed full-cycle accounting records, voucher entry, invoicing, payroll preparation, and financial reporting
- Filed VAT returns and ensured compliance with Bahrain tax regulations
- Performed Excel-based data reconciliation and financial analysis — developing strong data-driven analytical skills directly transferable to software development
- Worked as indoor salesman for a plumbing supplies firm — prepared quotations for construction and plumbing projects, handled customer queries and product recommendations
- Coordinated across client and internal teams, demonstrating professional communication and accountability

CAREER DEVELOPMENT

Full Stack Developer — Self-Directed Learning

India | 2024 – Present

Started learning web development in 2024 while employed; transitioned full-time upon returning to India in mid-2025.

- Built and deployed 3 full-stack PERN applications covering e-commerce with payment integration, data visualization, and JWT authentication
- Completed structured learning of React, Node.js, Express, PostgreSQL, REST API design, payment gateway integration and deployment workflows
- Actively studying JavaScript fundamentals, data structures, and system design for technical interviews

EDUCATION

Bachelor of Computer Applications (BCA)

2009 – 2012

- Coursework: Data Structures, Database Management, Operating Systems, Software Engineering, Web Technologies

KEY COMPETENCIES

Full Stack Development · React.js · Node.js · Express.js · PostgreSQL · REST API · JWT Authentication · Google OAuth 2.0 · Razorpay Payment Integration · E-Commerce Development · Payment Processing · Data Visualization · Chart.js · Git · GitHub · Netlify · Vercel · Render · bcrypt · pg Pool · MVC Architecture · Async/Await · Error Handling · Database Design · Query Optimization · Responsive Design · Component Architecture · Agile Development
